

Lavender Wreath Workshop

Cut your own lavender

Separate into 12/13 bunches, measuring from tip of pointer finger to tip of thumb

Attach the end of the wire to the frame

Place a bunch of lavender on the frame

Wrap the wire paddle around the bunch twice

Pull snug but not too tight

Continue this step around the wire frame

Tuck the last one or two bunches behind the first

Gather some of the first bunch with the last and wire together to blend together

Make a loop with the wire for hanging

Gently turn over and trim excess stems

Embellish if you like
